frequently-seen rejoinder to "curiosity killed the cat" is "but satisfaction brought The original form of the proverb, now little used, was "Care killed the cat". In this instance, "care" was defined as "worry" or "sorrow." As found at the following link https://en.wikipedia.org/wiki/Curiosity\_killed\_ According to a myth in many cultures, cats have

multiple lives. In many countries, they are believed to have nine lives, but in Italy, Germany, Greece, Brazil and some Spanish-speaking regions, they when one looks in the box, one sees the the number of lives is six. The myth is attributed to cat either alive or dead, not both alive the natural suppleness and swiftness cats exhibit to escape life-threatening situation Also lending credence to this myth is the fact

that falling cats often land on their feet, using a tive righting reflex to twist their bodie around. Nonetheless, cats can still be injured or As found at the following link:

weaving itself. That flock of birds taking off is a sign that something is moving in the area. Enough people are gathered already in the park

A stealth crowd

The thought experiment is also often featured in theoretical discussions of Tinos (Greek: Thyoc [tinos]) is a Greek island situated in the Aeaean Sea It is the interpretations of auantum me ocated in the Cyclades archipelago. In antiquity, Tinos was also known as hanics. Schrödinger coined the term Ophiussa (from ophis, Greek for snake) and Hydroessa (from hydor, Greek for the course of developing the though water). The closest islands are Andros, Delos, and Mykonos. It has a land area of Schrödinger's cat: a cat, a flask of

8.636 inhabitants. Tinos is famous amongst Greeks for the Church of Panagia Evangelistria, its 80 or so windmills, about 1000 artistic dovecotes, 50 active villages and its Venetian rtifications at the mountain. Exomyourao. On Tinos, both Greek Orthodox and Roman Catholic populations co-exist, and the island is also well known for its famous sculptors and painters, such as Nikolaos Gysis, Yannoulis Chalepas and

Nikiforos Lutras. The island is located near the geographical center of the Cyclades island complex and because of the Panagia Evangelistria church, with its reputedly miraculous icon of Virgin Mary that it holds, Tinos is also the center of a yearly pilgrimage that takes place on the date of the Dormition of the Virain Mary (15 August, "Deka pentavaoustos" in Greek). This is perhaps the most notable and still active yearh pilgrimage in the region of the eastern Mediterranean. Many pilgrims make their way the 800 metres (2,600 feet) from the ferry wharf to the church on their hands and knees as sign of devotion.

\*9 A lie is a statement that the stating party believes to be false and that is made with the apartments, Stockholm Sweden 2012 intention to deceive. The practice of communicating lies is called lying, and a person who communicates a lie may be termed a liar. Lies may be employed to serve a variety of in strumental, interpersonal, or psychological functions for the individuals who use them. Generally, the term "lie" carries a negative connotation, and depending on the context a person who communicates a lie may be subject to social, legal, religious, or criminal sanctions. In certain situations, however, lying is permitted, expected, or even encouraged. Believing and acting on false information can have serious consequences.

For a typical guery, there are thousands, if not millions, of webpages with helpful infor mation. Algorithms are the computer processes and formulas that take your questions and turn them into answers. Today Google's algorithms rely on more than 200 unique signals or "clues" that make it possible to guess what you might really be looking for. These signals include things like the terms on websites, the freshness of content, your
